SOP-QM-005: Corrective and Preventive Actions (CAPA)

Document ID: SOP-QM-005

Revision: 3.0

Effective Date: March 10, 2024

1. PURPOSE

This procedure establishes the systematic approach for identifying, investigating, and implementing corrective and preventive actions to eliminate causes of actual and potential nonconformities in accordance with FDA 21 CFR 820.100 and ISO 13485:2016.

2. SCOPE

This procedure applies to all nonconformities identified through customer complaints, internal audits, management review, quality data analysis, and risk management activities.

3. RESPONSIBILITIES

3.1 Quality Assurance Manager:

- Overall responsibility for CAPA system management
- Review and approval of CAPA investigations

3.2 CAPA Team:

- Investigation of root causes
- Development of corrective and preventive actions
- Implementation and verification of effectiveness

4. PROCEDURE

4.1 Problem Identification:

- Nonconformities shall be documented in the CAPA system
- Quality data shall be analyzed to identify trends
- Statistical techniques shall be used where appropriate

4.2 Investigation and Root Cause Analysis:

- Systematic investigation shall identify root causes
